

Emergency Preparedness: Product Suggestions for Hospitals

During these uncertain times, we understand the need for you to develop a contingency menu that addresses the staffing shortages, delivery interruptions, and other unpredictable events that might occur in the coming weeks. In response, Maple Leaf Foodservice has prepared a list of products that are ideally suited for these circumstances.

The following products are:

- Fully cooked - heat and serve, or serve cold, skilled labour not required
- Most are pre-portioned and IQF
- Suitable to be rethermed in all cold-plating and conventional systems
- Can be used in multiple menu applications to save on freezer space
- Traditional in appeal, easy to cut and chew
- Healthcare-friendly: either low in sodium or controlled sodium, suitable protein content (most are good to excellent sources of protein)

Sandwich Meats: Gluten-free. Deli meat is sliced for convenience

Product Description	Menu Applications	Maple Leaf Code	Sysco Code	GFS Code	Case Yield	Sodium (mg) Per Serving	Protein (g) Per Serving
